About our company

关于我们公司

BIERNACKI Meat Plant Ltd. has been in meat industry for almost 30 years. From the very beginning we've been focused on clients' needs, providing high quality products.

We work on highest quality beef with the state-of-art equipment, therefore we can guarantee fine beef of exquisite, recognizable brand.

Our plant has obtained a whole range of quality certificates such as HACCP, IFS, BRC. Moreover our products are Halal certified.

Our own slaughter house, with daily capacity of over 1000 heads and more importantly own farming, makes us champions of high quality with low prices. At the moment about 65% of slaughtered animals come from our own farms, what guarantees availability and flexibility of products.

We aim at keeping the lowest possible prices by excluding the middlemen; we want to be cheaper, more competitive! We have our own fleet of vehicles covering the whole Europe.

In 2022 we decided to add to our already extensive HORECA offer a range of frozen oriental style products.

You can learn more about them from this catalog. Naturally, we offer other unprocessed beef products, fresh and frozen, such as: Topside PAD, Striploin PAD, beef neck stewing meat, tripe and many other.

We turned our broad experience and market know-how, based on extensive clients' database from over 70 countries all over the world, into our firm's success.

If you are interested in a product, you can't find in our offer - let us know;

Give your firm a chance for success too!

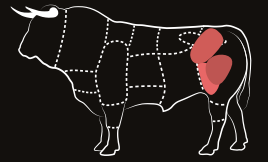

Nothing is impossible for us...
